To whom it may concern:

Reference is made to aquatic excavator work (spider-hoe) undertaken by Nu Creek Developments for the Watershed Restoration Program over the past 5 years. Our experience, typified by work at the Keogh River, has demonstrated that NuCreek is a strong performer, is sensitive to environmental conditions, and has excelled because of the ability of the operator to advance rapidly with restoration various and sometimes innovative practices. The same operator has also shown considerable keenness, as well as operational efficiency, in undertaking projects, which has been encouraging to those supervising aquatic restoration projects. It is evident that NuCreek is committed to aquatic restoration in this province.

Pat Slaney,
Technical Coordination Manager
Watershed Restoration Program
