To Whom It May Concern

Since 1998, I have had the pleasure of working with Len Mason on several different projects ranging from instream habitat creation (Mahatta, Colonial, Howlall, Keogh and Goodspeed projects) and high risk road deactivation (Victoria West and Johnson projects). Len has continually demonstrated a strong commitment to quality work yet always being aware of budgetary restraints involved in our projects. French Creek Forest Services in our role of supervising Western Forest Products Limited's Watershed Restoration Program has always appreciated Len's suggestions which have always resulted in a superior yet more economical final product. Lisa Giddens efforts to maintain invoicing up to date is also appreciated when track costs.

Should you have any further questions, please contact me at your convenience.

Patrick Donaghy

French Creek Forest Services

Contracting as Watershed Restoration Planner for Western Forest Products.
